

# Challenges Ahead for SoCal Urban Forests

## An Inland Urban Forest Council Workshop

OCTOBER 14, 2016

Western Municipal Water District  
14205 Meridian Parkway, Riverside  
310.562.4904 [info@inlandurbanforestcouncil.org](mailto:info@inlandurbanforestcouncil.org)

### What does the future hold for trees?

By now global warming should be a familiar term. What can a meteorologist tell us that will help us understand how climate change will effect the management of trees?

What are the landscape water conservation challenges and how are these challenges going to effect our management decisions?

With a prolonged drought and climate changes occurring, how we can effectively manage trees in our care? What can we do to adapt to these changes? What should we be planting to prepare for these changes? Join IUFC October 14 and find out.

#### AGENDA

- 8:30am Registration starts
- 8:45am Welcome- Nancy Sappington, IUFC President
- 9-10am *Climate Change and Weather*, Mark Jackson, Meteorologist, National Weather Service and NOAA
- 10-10:45am *Landscape Water Conservation Challenges*, Tim Barr, Western Municipal Water District

10:45-11:30am *Finding Resilience to Increasing Aridity within the Urban Forest*, Peter Ibsen, Citizen Science Project

#### LUNCH

12:30-1:30pm *Physiological Effects of Drought and Climate Change on Trees*, Dr. Fred Roth, Professor Emeritus, CalPoly Pomona

1:30 -2:15pm *Soil and Water Management Techniques to Adapt to Changing Climate Conditions*, Rebecca Latta, Consulting Arborist

#### BREAK

2:30 - 3:45pm *Recommended Tree Species Palettes for the New Climate Paradigm*, Dr. Jim Downer, UC Cooperative Extension

ISA CEUs will be available.

Registration Fee is ONLY \$65!
